A-VCAP

V-Mount Battery Terminal Cover

A smarter, faster way to protect your V-mount batteries.
Designed to help prevent accidental short circuits, the A-VCAP provides a simple and convenient way to protect V-mount battery terminals during storage, handling, and transportation.

With air-transport regulations for lithium-ion batteries becoming increasingly stringent, proper terminal protection is an important part of safe battery handling. The A-VCAP offers a practical solution for IDX batteries, including the DUO-CP and Imicro-PD series, helping users reduce the risk of accidental short circuits during transportation.

Unlike conventional insulation tape, which requires time to apply and remove, the A-VCAP features a simple, one-touch design that makes covering and uncovering battery terminals quick and easy.

An ideal solution for rental houses, broadcasters, and other professional users, the A-VCAP helps streamline battery handling and management, particularly in operations involving large numbers of batteries that are frequently transported between locations.

For added convenience and efficient inventory management, **the A-VCAP is available in packs of 10,** making it a practical addition to any professional battery kit.

Product Specifications

Material	:	PP plastic / Polypropylene material, Flame retardancy: 94-V0
Color:		Orange (Pantone 151C)
Dimensions(1 pcs):		Approx. 47(W) × 15(H) × 9(D) mm/Approx. 1.85(W) x 0.59(H) x 0.35(D) inches
Weight (1 pcs):		Approx. 1.0 g / Approx. 0.0022 lbs.
