# FS-BG5

## Fire Spread Suppression Bag

With the growing concern over fire incidents involving lithium-ion batteries and mobile battery packs, battery fire safety has become an increasingly important issue across the professional video industry. Broadcast stations, rental houses, and other industry professionals are actively seeking practical solutions to help mitigate the risks associated with unexpected battery fires.

The FS-BG5 offers an additional layer of safety. Made from highly fire- and heat-resistant fabric, it is designed to help delay the spread of fire to the surrounding area in the event of a lithium-ion battery fire caused by an abnormal condition.

Whether used in broadcast facilities, equipment rental operations, or other professional environments where batteries are handled, stored, or charged, the FS-BG5 provides a practical way to enhance existing fire-safety measures and help protect valuable equipment and surrounding assets.

FS-BG5 — A practical safety solution for greater peace of mind in professional battery management.

### Product Specifications

| | |
|---|---|
| Materials: | Outer layer: Glass fiber with silicone coating on both sides |
| Inner layer: | Glass fiber with a sputtered aluminum coating on one side |
| Flame resistance | 14 CFR (FAR) Part 25 of the U.S. Federal Aviation Regulations |
| Dimensions | Approx. 100(W) × 200(H) × 350(D) mm/ 3.94(W) x 7.87(H) x 13.78(D) inches |
| Weight Approx. | 400 g / Approx. 0.88 lbs. |
| Storage capacity | DUO-C98P size: 6 pcs/DUO-C150P/198P size 5 pcs |
